- VERIFY

Keep your account secure

Registering your MFA for root credentials will be required in 14 days.

Improve the security of your account by registering **multi-factor authentication (MFA)** using one of the options below. This provides a second means of verifying your identity in addition to your password. Learn more

MFA device name

Device Name

Maximum 128 characters. Use alphanumeric and '+ = , . @ - _' characters.

Passkey or Security key

Authenticate using your fingerprint, face, or screen lock. Create a passkey on this device or use another device, like a FIDO2 security key.

AWS recommends using a passkey or security key as an MFA device as they provide the most protection against attacks such as phishing.

Authenticator app

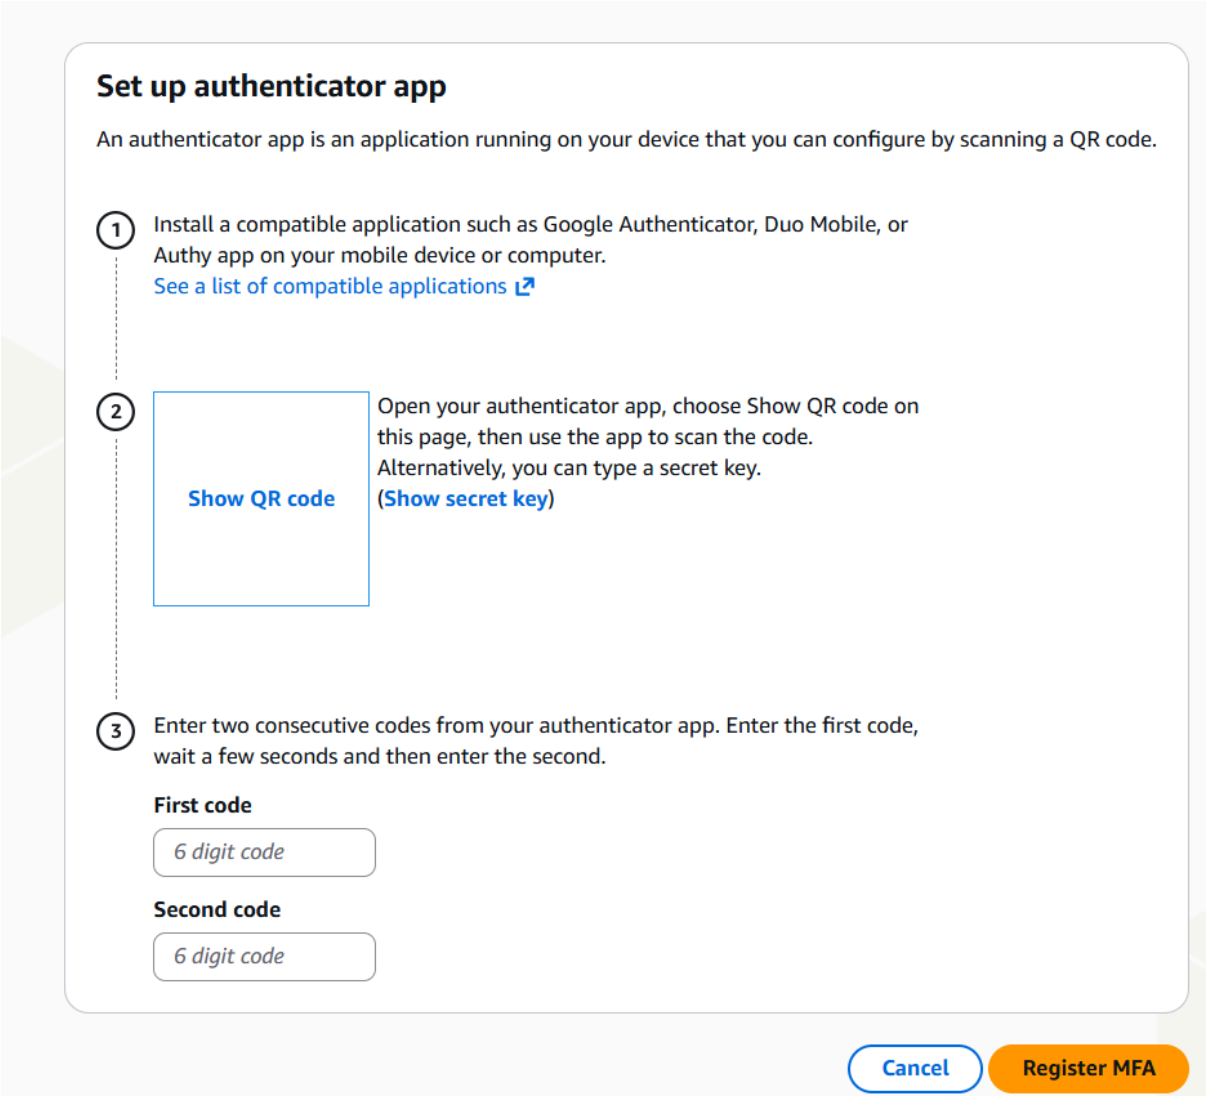

Authenticate using a code generated by an app installed on your mobile device or computer.

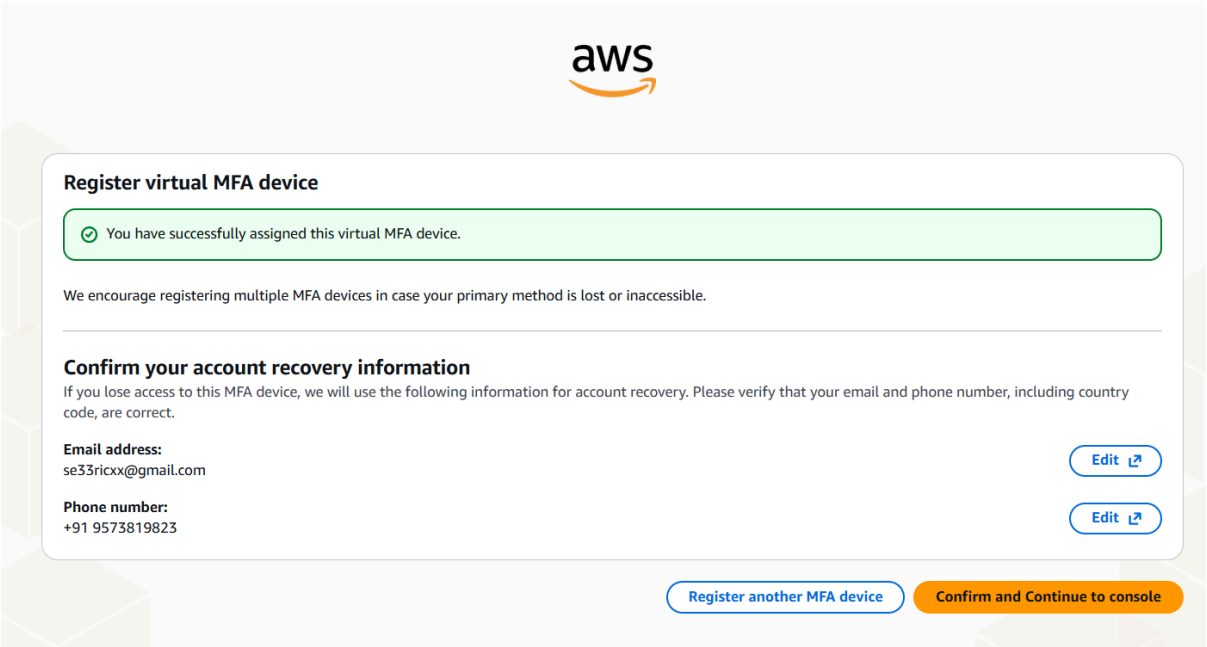

Hardware TOTP Token

Authenticate using a code generated by hardware TOTP token or other hardware devices.

- CHOOSE AUTHENTICATOR APP

- SHOW QR CODE AND GENERATE TWO CODES AND REGISTER

- SUCCESSFUL REGISTRATION
